

## St Peter's CE Primary School Principles of Teaching Science

### **Science is good in our school when:**

- We are confident problem solvers who create our own investigations
- We say “Yes it’s Science!” because it’s relevant to real life
  - We ask big questions and have big conversations
- We work together to solve problems and create formative conclusions
- We work with outside agencies to create WOW events
  - We can recognise the importance of science in our amazing world
  - We have classroom displays which reflect all enquiry types
